DETAILED ACTION

Election/Restrictions

1. Claims 3-16 stand withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 11 April 2006.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Short, US #3,858,339 in view of Crivelli et al. US #6,691,441.
3. Short teaches a moving loop advertisement including cover 12, a rod assembly having driving roller 8 mounted in the cover and driven roller 10 mounted out of the cover, the rollers being parallel, a driving device (motor 44), and display screen 4 surrounding the rollers with multiple labels 5 thereon. The display may be caused to operate intermittently.
4. Short does not teach an optical position sensor for providing intermittent motion, however such sensors are well known in the art, as shown by Crivelli et al. Crivelli et al.

Art Unit: 3611

teach a display having sensors for displaying the correct advertisement at the appropriate time. As in claim 12 of Crivelli et al. these may be optical sensors.

5. It would have been obvious to a person having ordinary skill in the art to utilize such sensors on the device of Short to provide intermittent motion so as to make the display more realistic or to attract the attention of onlookers.

Response to Arguments

6. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection. A new rejection has been made in response to Applicant's amendments to the claims.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3611

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
